### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed 12/3/03, 7/29/04, 8/13/04 and 2/2/05 have been received and made of record. Note the acknowledged PTO- 1449 forms enclosed herewith.

### ***Drawings***

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: : "w" is missing from Fig. 2, note page 8, lines 15-17.

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "86" located in Fig. 12 is not in the specification.

4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of

Art Unit: 3772

any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

5. The disclosure is objected to because of the following informalities:

Fig. 12, which represents a facing layer, is not described in the detailed description of specification;

In Figs. 25-28, projection elements appear to be indicated by reference character "57" not "56" as recited in the specification on page 34, lines 20-30 and page 35, line 4;

Page 29, line 19, "43" should read --47--;

Page 31, line 20, "43" should read --47--; and Page 32, line 28, "the needles" should read --the projection elements-- since they were previously defined as such.

Appropriate correction is required.

### ***Election/Restrictions***

6. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a method of making a wound dressing wherein perforations in a gel layer are made by depositing gel on a perforation device which includes a plurality of perforating elements, classified in class 602, subclass 43.

- II. Claims 15-16, drawn to a method of making a wound dressing wherein perforations in a gel layer are made by rotating a roller device having a plurality of perforating elements, classified in class 602, subclass 55.
- III. Claims 17-20, drawn to a method of making a wound dressing using a perforation device having a plurality of holes and a plurality of discrete perforating elements slidably disposed in the holes, classified in class 602, subclass 54.

The inventions are distinct, each from the other because of the following reasons:

- 7. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions have different modes of operations
- 8. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search and have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 9. During a telephone conversation with Justin Cassel on 12/21/06 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-14. Affirmation of this election must be made by applicant in replying to this Office action. Claims 15-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Art Unit: 3772

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

***Allowable Subject Matter***

11. Claims 1-14 are allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in that they disclose elastomeric gels with apertures.
